Network Connection Certificate
Airbus-Defence VMDS Application

The following equipment (hereafter referred to as the "Equipment") has been tested at the Airwave Network Reference System for connection to the Airwave network.

	Manufacturer/Customer:	Versions:	Test Date:	Certificate Issue Date:
Supplier and Equipment Information	Airbus – Defence and Space Partnership House Regent Farm Road Gosforth Newcastle upon Tyne NE3 3AF	**Product / System Designation:-** VMDS v2.5.11 MDCGClient v7.3.1 ScResponse v1.0.12(see note 3) **Certified and Tested on platforms:** Motorola MW810 R2 Panasonic CF-D1 Panasonic FZ-G1 Using either Windows XP or Windows 7 Panasonic CF-D1(ScResponse, see note 3 below - Windows 7) **Concession approval for platforms:** Motorola MW810 R1 Panasonic CF-19 Using either Windows XP or Windows 7 **Certified and Tested with TETRA Terminal Version:** Motorola MTM 800 version MR5.9.1 and MR5.13.1 Motorola MTH 800 as Officer radios only **Other Information/Approvals** N/A.	02 Sep 2015	24 Sep 2015

At the time the Equipment was tested the Airwave Network Reference System was configured as follows:

Airwave Network Software version: -	D7.1.2, Centracom Q303

Version 1.0

Airwave/Customer Test Specification Title and Issue: -	Generic Application and ICCS Connection Test plan for Centracom based solutions Issue 13
	Airwave Data Application Conformance Test Specification V4

The testing conducted on the Equipment suggests that it will not adversely impact the Airwave Network when connected and used (as it had been configured and tested during certification in accordance with the above specifications). Test scope was limited to conformance tests in accordance with the latest applicable specification and hence no specific functionality or performance of the product was tested unless specified below or in the test results.

Key Observation/Comments:

1. The initial Conformance testing was conducted on VMDS V2.5.10 using Windows XP/7. This has since been superceeded VMDS V2.5.11 due a minor GUI change that was deemed as very low impact and therefore no further Reference System testing was required.
2. The Panasonic CF-D1 MUST be 'software undocked' prior to removal from the cradle otherwise it will freeze and require rebooting.
3. ScResponse is certified ONLY for the Panasonic CF-D1.

Disclaimer:

1.   This conformance certificate does not indicate any security approval with respects to the operation of this hardware / software on the Airwave network.

It is the responsibility of the supplier and their customer (whether Airwave Solutions Ltd or 3rd party customer) to ensure the Airwave Accreditor's security requirements have been met before this hardware / software is deployed on the Airwave operational network. If this solution is deployed within the customer's security domain then the customers Accreditor / senior officer responsible for security must give their approval in line with the Airwave Service Code of Connection.

2.   The issuing of this Connection Certificate is for information purposes only and Airwave makes no warranty representation (express or implied) or guarantee whatsoever as to the fitness for purpose of the Equipment or its ability to operate correctly when connected to the Airwave Network or any other network or equipment. Your use of the Equipment, connection of the Equipment to the Airwave Network and reliance on the contents of this Connection Certificate (for whatever purpose) is at your sole risk. To the fullest extent permitted by law, Airwave shall not be liable for any loss or damage (whether due to negligence or otherwise) arising in relation to the Equipment, its connection to the Airwave Network or any other network and/or your reliance on the content of this Connection Certificate.
