Airwave/Customer Test Specification Title and Issue: -	Airwave Data Application Conformance Test Specification V4

The concession review conducted on the Equipment suggests that it will not adversely impact the Airwave Network (as configured in accordance with the above specifications) when connected and used. The review was limited to Conformance tests in accordance with the latest applicable specification and hence no specific functionality or performance of the product was considered unless specified below or in the test results.

Key Observation/Comments:

1. The initial Conformance testing was conducted on VMDS V2.5.10 using Windows XP/7 and was superseded by VMDS V2.5.11 (minor GUI change.) This concession replaces the original certificate following changes to the software as defined in Airbus VMDS V2.5.13 Release Notes dated 29 February 2016, Issue 1.0
2. No further conformance testing has been carried out and this Concession Certificate has been issued purely on the assessment of the submitted documents and declaration by Airbus
3. Key changes in the release – VMDS V2.5.12 unreleased NMEA sentence handling improvements and VMDS V2.5.13 addition of Crash Recovery System V1.0.0.20 and testing with Chemdata 2015.2.
