Network Connection Certificate

The following equipment has been tested for connection to the Airwave network (the "Equipment"). The Equipment has been tested on the Airwave Reference System Rugby.

	Manufacturer/Customer:	Versions:	Other relevant details:	Date(s) Certificate issued:
Supplier and Equipment Information	SunGard Public Sector Methuen Park Bath Road Chippenham Wiltshire, SN14 0TW	Product Designation:- SDS Messenger App. v1.5.0.0 Using TETRA terminals: Sepura SRH 3500 v8.3 & v9.5 Windows Installer v3.1, Windows XP SP3 Windows .net v3.5 SQL Server 2008 Exp Edition	Test Date: 10 Dec 09	Issued: 29 Jan 10

At the time the Equipment was tested the Airwave Network Reference System was configured as follows:

Airwave interface Software version	Airwave System was built to baseline R6.2 R4 SPU

The testing conducted on the Equipment suggests that it will not adversely impact the Airwave Network (as it had been configured in accordance with the above specifications) and when connected through 3rd Party Control Room interface. The testing was limited to conformance and hence no specific functionality or performance of the product was exercised apart that covered below in the test specifications.

Observation

1. The Testing was based on the Airwave Generic Data Application Conformance Test Plan issue 2.0 and unless otherwise stated no customer specific functional may have been tested.

2. Airwave Short Data link failure/re establishment - The SDS Messenger application will require a manual re-connection when the loss of SDR link has been re detected on the PEI Interface. It must be noted that during Airwave's CHS Cut-Over/Cutback or Data Resilience program, the re-connection of the SDR link to establish a connection will be the responsibility of the customer.

Note : For this application to be used on Motorola Elite Dispatcher Terminal (RDT) it will require additional approval from Motorola which will ensure that the SDS Messenger does not interfere with any existing applications already install on RDT.

Date : 29 Jan 2010

Disclaimer:

1.   This conformance certificate does not indicate any security approval with respects to the operation of this hardware / software on the Airwave network.

It is the responsibility of the supplier and their customer (whether Airwave Ltd or 3rd party customer) to ensure the Airwave Accreditor's security requirements have been met before this hardware / software is deployed on the Airwave operational network. If this solution is deployed within the customer's security domain then the customers Accreditor / Senior officer responsible for security must give their approval inline with the Airwave Service Code of Connection.

2.   The issuing of this Connection Certificate is for information purposes only and Airwave makes no warranty or guarantee whatsoever as to the fitness for purpose of the Equipment or its ability to operate correctly when connected to the Airwave Network or any other network or equipment. Your use of the Equipment, connection of the Equipment to the Airwave Network and reliance on the contents of this Connection Certificate (for whatever purpose) is at your sole risk. Airwave shall not be liable for loss or damages of any kind (whether due to negligence or otherwise) arising in relation to the Equipment, its connection to the Airwave Network and/or your reliance on the content of this Connection Certificate.
