## Airwave Network Connection Certificate Remote MCC7500 DCS

The following equipment (hereafter referred to as the "Equipment") has been tested at the Airwave Network Reference System for connection to the Airwave network.

	Manufacturer/Customer:	Versions:	Test Date:	Certificate Issue Date:								
Supplier and Equipment Information	Capita Secure Solutions and Services Methuen Park Bath Road Chippenham Wiltshire SN14 0TW	<b>Product / System Designation: -</b> DS3000 DSX 2020 R1 (39x)  <b>OS Versions: -</b> Dispatch Client: Windows 2010 ICCS Server: Windows Server 2016 Windows Server 2019  <b>Software Versions:</b> 39.0.2.3  <table border="0"> <tr> <td><u>PACKAGE:</u></td> <td><u>VERSION:</u></td> </tr> <tr> <td>MCC7500 DCS</td> <td>39.0.2.3</td> </tr> <tr> <td>CADI Host</td> <td>39.0.2.3</td> </tr> <tr> <td>SDR Host</td> <td>39.0.2.3</td> </tr> </table>	<u>PACKAGE:</u>	<u>VERSION:</u>	MCC7500 DCS	39.0.2.3	CADI Host	39.0.2.3	SDR Host	39.0.2.3	10 Aug 2020	20 Aug 2020
<u>PACKAGE:</u>	<u>VERSION:</u>											
MCC7500 DCS	39.0.2.3											
CADI Host	39.0.2.3											
SDR Host	39.0.2.3											

At the time the Equipment was tested, the Airwave Network Reference System was configured as follows:

<b>Airwave Network Software version: -</b>	<b>Motorola Dimetra R7.1.2 &amp; R9.0.2</b>  <b>DCS Build:</b> ) CCE: R09.00.02.30 ) CRAM: R09.00.02.11 ) AGTW: R09.00.02.27
<b>Airwave/Customer Test Specification Title and Issue: -</b>	<b>Generic Remote MCC7500 DCS ICCS Conf Issue 0.4</b>

The testing conducted on the Equipment suggests that it will not adversely impact the Airwave Network when connected and used (as it had been configured and tested during certification in

accordance with the above specifications). Test scope was limited to conformance tests in accordance with the latest applicable specification and hence no specific functionality or performance of the product was tested unless specified below or in the test results.

**Key Observations/Comments:**

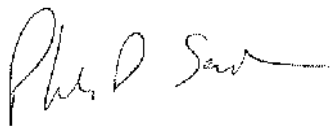

1. Testing excludes the Alias Interim Service (AIS) as requested by Capita due to the fact that the MCADI module in use is the same as previous releases
2. Full testing of the Customer Border Interlink network was not able to be completed. Capita presented a connection to the interface of Router A at the Airwave DCS Control Room demarcation point, therefore resilience testing was limited to failure and recovery of Router A only on both a Type 2A and Type 2B Control Room.

**Disclaimer:**

1. This conformance certificate does not indicate any security approval with respects to the operation of this hardware / software on the Airwave network.

It is the responsibility of the supplier and their customer (whether Airwave Solutions Ltd or 3rd party customer) to ensure the Airwave Accreditor's security requirements have been met before this hardware / software is deployed on the Airwave operational network. If this solution is deployed within the customer's security domain then the customers Accreditor / senior officer responsible for security must give their approval inline with the Airwave Service Code of Connection.

2. The issuing of this Connection Certificate is for information purposes only and Airwave makes no warranty representation (express or implied) or guarantee whatsoever as to the fitness for purpose of the Equipment or its ability to operate correctly when connected to the Airwave Network or any other network or equipment. Your use of the Equipment, connection of the Equipment to the Airwave Network and reliance on the contents of this Connection Certificate (for whatever purpose) is at your sole risk. To the fullest extent permitted by law, Airwave shall not be liable for any loss or damage (whether due to negligence or otherwise) arising in relation to the Equipment, its connection to the Airwave Network or any other network and/or your reliance on the content of this Connection Certificate.
