At the time the Equipment was tested the Airwave Network Reference System was configured as follows:

Airwave interface Software version MCC7500 R02.06.52	Airwave System was built to baseline R6.2_005.12
--	---

The testing conducted on the Equipment suggests that it will not adversely impact the Airwave Network (as it had been configured in accordance with the above specifications). The testing was limited to terminal conformance in accordance with the latest specification and hence no specific data application functionality or performance of the product was exercised unless specified below or in the test results.

Notes/Observations:

- The system does not support the use of Multi-groups as talkgroups are set up as multi-select resources. Mixing multi-groups and multiselects is not possible.
