Network Connection Certificate

The following equipment (hereafter referred to as the "Equipment") has been tested at the Airwave Network Reference System for connection to the Airwave network.

	Manufacturer/Customer:	Versions:	Test Date:	Certificate Issue Date:
Supplier and Equipment Information	Cyfas Systems Ltd Unit 5 Ivel Road Business Park 1 Ivel Road SHEFFORD Bedfordshire SG17 5JU Tel 01462 818880	Product Designation:- Cyfas C-Soft Plus Radio Connected Dispatch System Operating System: - MS Windows 7 SP1 Cyfas version: C-Soft+ (Data) v26/1001/5 V5.10.2 C-Soft (V6.2 Audio) IP233 V4.5 Sepura PEI Interface v26/1009/2 V2.8.2 Motorola PEI Interface v26/1011/1 V1.1.1 Certified and Tested with TETRA Terminals: - Sepura SRM/SRG3500W V10.5-004 Motorola MTM800E MR5.13.1 Cyfas C-Soft+ with Sepura PEI interface certified with: - Cyfas Cytrack Mapping System V1.2.2.0	23 Sept 2013	20 Nov 2013

At the time the Equipment was tested the Airwave Network Reference System was configured as follows:

Airwave Network Software version: -	D7.1.1 / D7.1.2 R7.1_001.01/03
Airwave Test Specification Title and Issue: -	Radio Connected Dispatch Console Generic Test Plan Iss.1

The testing conducted on the Equipment suggests that it will not adversely impact the Airwave Network when connected and used (as it had been configured and tested during certification in accordance with the above specifications). Test scope was limited to conformance tests in accordance with the latest applicable specification and hence no specific functionality or performance of the product was tested unless specified below or in the test results.

Version 1.0

Key Observation/Comments:

1. This certificate applies to the C-Soft Plus radio connected dispatch solution connected directly to either one or more Sepura SRM/SRG3500W mobiles operating with version 10.5 software, or one or more Motorola MTM800E mobiles operating with MR5.13.1 software.

2. If the originating radio terminal is configured to deliver status messages on time stamped SDS format then both status and emergency indications are delivered to the operator.

3. The PEI connected solution is not a fully integrated ICCS, and therefore has limited functionality. It does not support Ambience Listeing or Patching. If multiple PEI connected fixed mobiles are available then Multiselect is supported.

Disclaimer:

1. This conformance certificate does not indicate any security approval with respects to the operation of this hardware / software on the Airwave network.

It is the responsibility of the supplier and their customer (whether Airwave Solutions Ltd or 3rd party customer) to ensure the Airwave Accreditor's security requirements have been met before this hardware / software is deployed on the Airwave operational network. If this solution is deployed within the customer's security domain then the customers Accreditor / senior officer responsible for security must give their approval inline with the Airwave Service Code of Connection.

2. The issuing of this Connection Certificate is for information purposes only and Airwave makes no warranty representation (express or implied) or guarantee whatsoever as to the fitness for purpose of the Equipment or its ability to operate correctly when connected to the Airwave Network or any other network or equipment. Your use of the Equipment, connection of the Equipment to the Airwave Network and reliance on the contents of this Connection Certificate (for whatever purpose) is at your sole risk. To the fullest extent permitted by law, Airwave shall not be liable for any loss or damage (whether due to negligence or otherwise) arising in relation to the Equipment, its connection to the Airwave Network or any other network and/or your reliance on the content of this Connection Certificate.
