Airwave Network Connection Concession Certificate Frequentis URG R2 Family on Centracom

The following equipment (hereafter referred to as the "Equipment") has been reviewed by the Airwave Network Reference System for connection to the Airwave network.

	Manufacturer/Customer:	Versions:	Review Date:	Certificate Issue Date:
Supplier and Equipment Information	Frequentis AG Innovationsstraße 1 A-1100 Vienna Austria	Product / System Designation:- Unified Radio Gateway (URG) Release 2 – Family Software Version: CADI Server 7.50.1 SDS Server 7.52.1 TAL (Client) 46.10.12 The following running on Windows 7 OS: TAL (Server) 46.10.12	21 Jun 2021	05 Aug 2021

The Equipment was reviewed for connection to the Airwave Network Reference System configured as follows:

Airwave Network Software version: -	**D9.0.2 and D7.1.2, Centracom Q303**
Airwave/Customer Test Specification Title and Issue: -	**Generic Application and ICCS Connection Test plan for Centracom based solutions Issue 13**

The concession review conducted on the Equipment suggests that it will not adversely impact the Airwave Network (as configured in accordance with the above specifications) when connected and used. The review was limited to Conformance tests in accordance with the latest applicable specification and hence no specific functionality or performance of the product was considered unless specified below or in the test results.

Key Observation/Comments:

1.	The initial Conformance testing was conducted on 5/12/18 on URG Rel. 2.0. A bug fix roll up release resulted in the issue of a concession certificate on 05/06/20. This concession is issued

as a result of a further bug fix rollup release following changes to the software as defined in module release information provided by Frequentis.

2.   No further conformance testing has been carried out and this Concession Certificate has been issued purely on the assessment of the submitted documents and declaration by Frequentis.

3.   Key changes in the release –
QPSTEGW-7174> "RPC.net multi-license does not work for CadiProxies running on the same subnet. Required use of RPC_NET4.dll v. 4.0.2.0
QPSTEGW-8979> "Wrong API Version used in RegisterAppInstanceVersion" Required use of MCDI_VERSION_05_00.
Other fixes and improvements related to logging, DCS features and third party changes.

Disclaimer:

1.   This conformance certificate does not indicate any security approval with respects to the operation of this hardware / software on the Airwave network.

It is the responsibility of the supplier and their customer (whether Airwave Solutions Ltd or 3rd party customer) to ensure the Airwave Accreditor's security requirements have been met before this hardware / software is deployed on the Airwave operational network. If this solution is deployed within the customer's security domain then the customers Accreditor / senior officer responsible for security must give their approval in line with the Airwave Service Code of Connection.

2.   The issuing of this Connection Certificate is for information purposes only and Airwave makes no warranty representation (express or implied) or guarantee whatsoever as to the fitness for purpose of the Equipment or its ability to operate correctly when connected to the Airwave Network or any other network or equipment. Your use of the Equipment, connection of the Equipment to the Airwave Network and reliance on the contents of this Connection Certificate (for whatever purpose) is at your sole risk. To the fullest extent permitted by law, Airwave shall not be liable for any loss or damage (whether due to negligence or otherwise) arising in relation to the Equipment, its connection to the Airwave Network or any other network and/or your reliance on the content of this Connection Certificate.
