## Airwave Network Connection Concession Certificate

The following equipment (hereafter referred to as the "Equipment") has been reviewed by the Airwave Network Reference System for connection to the Airwave network.

	Manufacturer/Customer:	Versions:	Review Date:	Certificate Issue Date:
Supplier and Equipment Information	Command Central CRS Team, Airwave Solutions Ltd., Unit 1 Chevron Industrial Estate Eaton Road Hemel Hempstead HP2 7UB.	<b>Product / System Designation:-</b> Command Central CRS V14.6 PEI Connected Radio  <b>OS Versions: -</b> Dispatch PC - Windows 10 Gateway PC – Windows 10 Pro Server PC – Windows Server 2019  <b>Software Versions:</b> Software v14.6.6277 Release date & time: 12/04/2021 06:12 UTC  Certified and Tested with TETRA Terminal Versions: Motorola MTM5400 with MR14.0 Rel.(R27.020.8723)	20 Apr 2021	21 Apr 2021

The Equipment was reviewed for connection to the Airwave Network Reference System configured as follows:

<b>Airwave Network Software version: -</b>	<b>Motorola Dimetra V9.0.2 &amp; V7.1.2</b>
<b>Airwave/Customer Test Specification Title and Issue: -</b>	<b>Generic Radio Dispatch Console Test plan Issue 1</b>

The concession review conducted on the Equipment suggests that it will not adversely impact the Airwave Network (as configured in accordance with the above specifications) when connected and used. The review was limited to Conformance tests in accordance with the latest applicable specification and hence no specific functionality or performance of the product was considered unless specified below or in the test results.

**Key Observation/Comments:**

1. The initial Conformance testing was conducted on 23/03/21 on Command Central CRS V14.5 and this concession supplements the original certificate following changes to the software as listed in the v14.6 Release Note dated 12/04/2021 and described in an impact statement provided by the Command Central CRS Team.
2. No further conformance testing has been carried out and this Concession Certificate has been issued purely on the assessment of the submitted documents and declaration by Command Central CRS.
3. Key changes in the release –  
Bugfix release including multiple improvements to the User Interface.

Observations from original test event: -

4. When sending an SDS message from a radio to a dispatcher with the Read Receipt flag set, a "failed" message is received by the radio when the dispatcher reads the message.
5. Sending consecutive SDS messages from a dispatcher to a radio, when the SDR has been shut down, results in a "Message Sent" outcome for every SDS message sent. A "Message Fail" is to be expected for each message sent whilst the SDR is shut down.
6. Please refer to the CC CRS v14.6 Release note for further information regarding functionality.

**Disclaimer:**

1. This conformance certificate does not indicate any security approval with respects to the operation of this hardware / software on the Airwave network.

It is the responsibility of the supplier and their customer (whether Airwave Solutions Ltd or 3rd party customer) to ensure the Airwave Accreditor's security requirements have been met before this hardware / software is deployed on the Airwave operational network. If this solution is deployed within the customer's security domain then the customers Accreditor / senior officer responsible for security must give their approval in line with the Airwave Service Code of Connection.

2. The issuing of this Connection Certificate is for information purposes only and Airwave makes no warranty representation (express or implied) or guarantee whatsoever as to the fitness for purpose of the Equipment or its ability to operate correctly when connected to the Airwave Network or any other network or equipment. Your use of the Equipment, connection of the Equipment to the Airwave Network and reliance on the contents of this Connection Certificate (for whatever purpose) is at your sole risk. To the fullest extent permitted by law, Airwave shall not be liable for any loss or damage (whether due to negligence or otherwise) arising in relation to the Equipment, its connection to the Airwave Network or any other network and/or your reliance on the content of this Connection Certificate.
