

Network Connection Concession Certificate For Northgate SDS Calltouch Application and SDA

The following equipment (hereafter referred to as the "Equipment") has been reviewed by the Airwave Network Reference System for connection to the Airwave network.

	Manufacturer/Customer:	Versions:	Review Date:	Certificate Issue Date:
Supplier and Equipment Information	Northgate Information Solutions Ross House, Kempston Way, Suffolk Business Park, Bury St Edmonds Suffolk IP32 7AR.	Product Designation:- Calltouch SDS Application V2.53.17 with Sepura SDA Build versions: Windows Server 2003 R2 32bit and 2008 R2 64bit SDS Application v2.53.17 Sepura SRH3800 version 9.5 with SDA version 1.7 for West Midlands Police Motorola MTH850 version 5.13	28 July 2015	29 July 2015
		using Kent FRS codeplug		

The Equipment was reviewed for connection to the Airwave Network Reference System configured as follows:

Airwave Network Software version: -	Dimetra Release 7.1.2, Centracom Q303	
Airwave/Customer Test Specification	Airwave Data Application Conformance Test	
Title and Issue: -	Specification V4	

The concession review conducted on the Equipment suggests that it will not adversely impact the Airwave Network (as configured in accordance with the above specifications) when connected and used. The review was limited to Conformance tests in accordance with the latest applicable specification and hence no specific functionality or performance of the product was considered unless specified below or in the test results.

Key Observation/Comments:

- 1. The initial Conformance testing was conducted on 4/10/2012 on version 2.53.11 and this concession replaces the original certificate following changes to the software as defined in the Release Note: CallTouch SDS Version 2.53.17.3435, dated July 2015.
- 2. No further conformance testing has been carried out and this Concession Certificate has been issued purely on the assessment of the submitted documents and declaration by Northgate Information Solutions.
- 3. The original certificate contained an observation: When an invalid data format was sent for Stop and Search using Sepura SDA, the information data did not match the information at the Server end.
- 4. Key changes in this release: -
 - Various bug fixes in the decoding and encoding of the GPS protocols.
 - One feature improvement: -- The SDS Control requests speed and direction by default when making a triggered location request.

Disclaimer:

1. This conformance certificate does not indicate any security approval with respects to the operation of this hardware / software on the Airwave network.

It is the responsibility of the supplier and their customer (whether Airwave Solutions Ltd or 3rd party customer) to ensure the Airwave Accreditor's security requirements have been met before this hardware / software is deployed on the Airwave operational network. If this solution is deployed within the customer's security domain then the customers Accreditor / senior officer responsible for security must give their approval in line with the Airwave Service Code of Connection.

2. The issuing of this Connection Certificate is for information purposes only and Airwave makes no warranty representation (express or implied) or guarantee whatsoever as to the fitness for purpose of the Equipment or its ability to operate correctly when connected to the Airwave Network or any other network or equipment. Your use of the Equipment, connection of the Equipment to the Airwave Network and reliance on the contents of this Connection Certificate (for whatever purpose) is at your sole risk. To the fullest extent permitted by law, Airwave shall not be liable for any loss or damage (whether due to negligence or otherwise) arising in relation to the Equipment, its connection to the Airwave Network or any other network and/or your reliance on the content of this Connection Certificate.

The D Sav
